

We are dedicated to providing tents services that exceed your expectations. Our extensive tent inventory allows us to provide Oklahoma with the right tent for all types of events. We are proud to assist our customers in choosing the correct tent for any event. Our professionally trained tent installation crews have been providing Oklahoma with tents for over 28 years.

Tent layouts that are drawn to scale are available to ensure that you've accounted enough space for everything under your tent. Because there are so many possible options for set up inside of your tent, you will have a much better sense of the space available when you lay it out on paper.

WHAT KIND OF SURFACE WILL MY TENT BE INSTALLED ON?

Grass: The rental price of a tent includes the cost of staking it in grass. Our professionally trained staff inserts a stake that is 36" long into the grass to secure the tent. You'll be required to mark all underground lines that cannot be located by OKIE, such as sprinkler lines, underground drains, or any lines not laid by the city.

Concrete Installation: To install a tent on concrete, Marianne's Rentals inserts an anchor up to 6" long into the cement with a drill. When Marianne's Rentals takes down a tent, the anchor will be left in the concrete.

Asphalt Installation: To install a tent on asphalt, Marianne's Rentals drives a stake up to 30" in the asphalt. The holes will be filled with asphalt plugs.

Water Barrels: Water barrels are available. Water barrels cannot be used when winds are predicted above 20 mph. An unlocked water source must be available within 100 feet.

WHAT IS THE SPACE REQUIREMENT FOR A TENT?

No matter what the surface, you'll need to account for tie-down ropes and walkways around the tent. Once you establish the maximum width the tent can be, you can determine the length. For spaces that are odd-shaped or contain obstacles such as trees or light posts, we suggest scheduling a site visit to determine which tent works best for your event.

We generally have to have a minimum of 7 feet clearance outside the perimeter of the tent on all four sides. If you do not have this clear area, you must let Marianne's Rentals know so that a site visit can be arranged prior to delivery. A refund will not be issued for any tent that does not fit in the designated space. Site visits to confirm space requirements are recommended occur early in the planning process. Additional fees may apply for site visits.

WHAT AM I FORGETTING?

Many cities in Oklahoma require different permits. These could include but aren't limited to tent or noise permits. Permit information varies for selected jurisdictions.

Lighting and electrical power are necessary for a successful tented event. Don't forget sufficient light and electrical power for all access routes and support staff areas. A tent with sidewalls may require lighting during daylight hours.

Oklahoma State Law requires that underground lines be located by OKIE (www.CallOKIE.com or 1-800-522-6543) for any tent that will be staked into the ground. We require that OKIE is called five days prior to the delivery date on the reservation.

WHAT SIZE TENT DO I NEED FOR MY EVENT?

This is the most important question about tenting because you want to provide adequate space for your guests. The tent capacity chart below is only a basic guide. These sizes do not account for additional space that might be required when a bar, buffet, dance floor, stage, etc. are under the tent. Each event is slightly different in nature and therefore these numbers should be used as a starting point only.

FRAME TENT CAPACITY			
TENT SIZE	SQUARE FOOTAGE	AUDITORIUM SEATING	BANQUET SEATING
10X10	100	14	10
10X20	200	28	20
